

25X1

Copy 5 of 6

23 November 1955

MEMORANDUM FOR: Medical Staff

ATTENTION:

SUBJECT:

25X1

1. In our conversation of this morning, we discussed proposed utilization of subject on Project assignment. This is to confirm that subject's assignment would be in an Air Force capacity at his place of duty, an Air Force installation. The only Project personnel at this particular installation will be regular Air Force personnel on detail to the Project, and it is contemplated that subject's service would be comparable to a normal assignment which might be made in his case by the Air Force.

2. As [ ] mentioned to you on 22 November, the only deviation from what might be considered a routine Air Force assignment will be the planned utilization of subject as a teletype operator and probable clearance for manual cryptography duties.

3. We would appreciate any consideration which might be given to a review of subject's suitability for Project utilization in line with the above stated plans.

JAMES A. CUMMINGHAM, JR.  
Administrative Officer
